SECURING YOUR FUTURE

Empowering organizations to build secure, compliant, and resilient operations.

End-to-End
Cybersecurity Coverage

Standards-Based +
Outcome-Focused Approach

Strategic & Fractional
Leadership Support

GRC-Driven
Security Foundation

Serket-Tech Security is a governance, risk, and compliance (GRC)-driven cybersecurity firm that strengthens every pillar of an organization's security program, from identity and infrastructure to data protection, threat management, and cloud security.

Our work begins with GRC as the foundation. Every technical, operational, and strategic decision is mapped to trusted frameworks such as NIST CSF, CMMC Level 2, HITRUST, SOC 2, ISO 27001, and HIPAA. This ensures your program is not only compliant, but aligned with measurable business outcomes.

By combining standards-based rigor with a practical, outcome-oriented approach, we design scalable solutions that bridge the gap between regulatory requirements and real-world security performance. Whether establishing new programs, upgrading existing controls, or providing fractional leadership, Serket-Tech Security delivers end-to-end cybersecurity guidance rooted in both governance and business value.

“Our leadership brings experience. Our method brings results. Together, they create a repeatable framework that turns governance and strategy into measurable security outcomes.”

GRC-Driven Solutions

Every engagement begins with a standards-aligned foundation built on frameworks such as NIST, HITRUST, ISO 27001, and CMMC.

Business-Aligned Security

We design programs that support organizational goals, enabling efficiency, scalability, and measurable ROI.

Comprehensive Cyber Capabilities

We offer expertise across identity, cloud, network, endpoint, application, and data security domains.

Engineering and Implementation

We translate policies into practice through secure configurations, automation workflows, and integrated monitoring.

Continuous Program Support

We provide lifecycle governance, maturity tracking, and improvement planning to sustain long-term resilience.

Collaboration and Partnership

We work alongside internal teams and trusted technology partners to deliver cohesive, end-to-end security outcomes.

Industry-Recognized Credentials

Serket-Tech Security is a Registered Practitioner Organization, authorized to guide contractors through CMMC readiness and defensible audit preparation. Our team includes HITRUST-certified consultants and specialists in SOC 2 readiness. We provide comprehensive SOC 2 preparation, evidence alignment, and audit support, while also offering standards-based HITRUST guidance backed by verification and real-world audit experience.

ELEVATE YOUR SECURITY

A methodology that connects governance, business priorities, and technology execution.

Every organization's security journey begins by understanding its current posture and defining what must come next.

The Serket-Tech Security method creates measurable progress at each stage, integrating governance, risk, and compliance with technical depth and long-term partnership.

Discover and Baseline

We assess your goals, risk posture, and regulatory exposure through interviews, control reviews, and automated assessments aligned to NIST, HITRUST, ISO 27001, and CMMC.

Measure and Mature

We establish key risk and performance indicator metrics that measure and monitor progress, validate control effectiveness, and guide continuous improvement.

Define and Align

Findings are translated into actionable insights and mapped to business drivers. Leadership receives a prioritized roadmap focused on meaningful outcomes—not checklists.

Advise and Support

Through fractional CTO/CISO services, readiness reviews, and ongoing advisory, we ensure your program remains aligned with evolving regulations and organizational priorities.

Design and Implement

Our consultants and engineers build the technical and procedural foundation required to achieve those outcomes, configuring controls, automating evidence collection, and integrating monitoring.

Sustain and Evolve

We help organizations shift from compliance-driven activity to a culture of proactive risk management, integrating lessons learned into long-term strategy and resilience planning.

BUILT ON THREE CORE PRINCIPLES:

"Our method builds results. Our reputation is built on trust."

CYBERSECURITY LEADER

OUR CEO'S INTRODUCTION

Dante Jackson

Founder & Chief Executive Officer

Strategic leader overseeing company vision, partnerships, and delivery excellence.

"I believe cybersecurity should be a right, not a privilege. At Serket-Tech Security, we provide affordable services that make strong cybersecurity accessible to companies of all sizes."

"As a cybersecurity professional with experience in both the U.S. government and the private financial sector, including senior leadership roles at a top 10 U.S. bank, I offer broad expertise in threat management, data protection, insider threat mitigation, IT risk management, resilience strategies, and security investigations."

OUR LEADERSHIP TEAM

Experience that defines our method. Expertise that drives measurable outcomes.

Dante Jackson

Founder &
Chief Executive Officer

Strategic leader overseeing company vision, partnerships, and delivery excellence.

Robert Igarashi

Chief Technology Officer & Chief
Information Security Officer

Responsible for technical strategy, security architecture, and advanced engineering oversight.

Matthew Gonko

Director of Governance,
Risk & Compliance

Leads GRC initiatives, regulatory alignment, and standards-based program development.

Newton Conyard

Director of
Security Engineering

Guides secure engineering practices, cloud architecture, and technical implementation.

Andrue Netcher

Director of Managed
Security Services

Strategic leader overseeing company vision, partnerships, and delivery excellence.

Thelma Gregory

Chief Expansion Officer

Drives revenue growth, manages the sales team, and supports national expansion.

Riza Angeles

Senior Consultant

Provides governance support, audit preparation, compliance alignment, and program development.

Voltaire Bondoc

Principal AI Engineer

Drives innovation in AI-enhanced security automation, predictive analytics, and advanced tooling.

WHY SERKET-TECH SECURITY

Your trusted partner for governance,
compliance, and cyber resilience.

Serket-Tech Security seamlessly unites governance, risk, and compliance with hands-on technical expertise. That's why our clients rely on us to reduce complexity, strengthen organizational resilience, and deliver measurable business value.

WHAT WE DELIVER

response

“From framework to execution, we bring clarity, consistency, and confidence to every security program.”

WHAT SETS US APART

GRC at the Core

Every engagement begins with frameworks such as NIST, HITRUST, ISO 27001, SOC 2, and CMMC. We build security programs that are compliant by design and resilient in practice.

Business Alignment

Security only has a lasting impact when it enables organizational goals. We help leadership connect compliance investments to operational performance and growth.

Depth of Expertise

Our team includes CISOs, engineers, and compliance specialists with decades of experience across healthcare, finance, manufacturing, media, legal, and more.

Long-Term Partnership

We operate as an extension of your team, offering ongoing advisory, readiness support, and managed services that evolve with your environment.

Can You Afford to Leave Your Organization Vulnerable?
