

Security Without Compromise

Cybersecurity, compliance, and resilience services for regulated, growth-stage, and mission-critical organizations.

Build Trust Faster

Support customer diligence, contract reviews, and audit conversations with clearer controls and evidence.

Strengthen Vendor Oversight

Improve supplier reviews, contract security requirements, and third-party risk reporting.

Reduce Audit Friction

Turn scattered requirements into a disciplined program with owners, timelines, and defensible proof points.

Improve Resilience

Link governance, testing, monitoring, and response planning before a disruption occurs.

Core Services

■ Governance, Risk, and Compliance

Policies, standards, risk governance, audit preparation, board reporting, and regulatory program support.

■ SOC 2, HITRUST, and CMMC Programs

Readiness, scoping, evidence planning, remediation support, and audit or assessment preparation.

■ Security Assessments and Penetration Testing

Security posture reviews, vulnerability assessment, architecture analysis, and internal, external, web, cloud, and wireless testing.

■ Managed Security Services

Threat monitoring, endpoint and identity coverage, alert triage, MDR support, and continuous control monitoring.

■ Framework Alignment and Risk Assessments

Gap assessments and roadmaps aligned to NIST CSF, ISO 27001, CIS Controls, PCI DSS, HIPAA, FERPA, GLBA, and related obligations.

■ Third-Party and Vendor Risk

Due diligence, supplier reviews, security requirements, and recurring oversight workflows.

■ Incident Response, Tabletop, and Forensics

Response planning, tabletop facilitation, live incident support, forensic coordination, and recovery guidance.

■ vCISO, Program Development, and Training

Security leadership, roadmap planning, tool selection, workforce training, executive reporting, and future risk advisory.

Common Ways Clients Engage

1. Readiness and Assurance Program

Built for teams preparing for audits, procurement reviews, customer diligence, or new compliance obligations.

Included Services

- GRC and policy program design
- Framework mapping and risk assessment
- SOC 2, HITRUST, or CMMC readiness
- Evidence planning, remediation, and assessment support

2. Security Validation and Hardening

Built for teams that need to identify gaps, test defenses, and reduce exposure before a launch, renewal, or review.

Included Services

- Security posture and architecture reviews
- Vulnerability assessments and prioritized remediation
- Internal, external, web, cloud, and wireless testing
- Tabletop exercises and response plan testing

3. Continuous Operations and Resilience

Built for organizations that want readiness to become an operating model rather than a one-time project.

Included Services

- Managed monitoring and MDR support
- Third-party risk workflows and recurring assurance support
- Incident response retainers and crisis preparation
- vCISO steering, board reporting, and program oversight

Who We Serve

- Financial services and fintech
- Healthcare and business associates
- Higher education and research
- Legal, logistics, defense, technology, and professional services

Oversight and Standards

- NIST CSF, ISO 27001, CIS Controls, SOC 2
- HITRUST, CMMC, PCI DSS, HIPAA
- GLBA Safeguards Rule, FERPA, HECVAT, NYDFS
- State, federal, contractual, and customer-driven security requirements
